(RTTNews) - Monday, CVS Caremark (CVS: News ) said it is taking an increased ownership interest in Generation Health, Inc., a genetic benefit management company or GBM. The two companies last month announced a strategic partnership to expand pharmacogenomic or PGx clinical and testing services for CVS Caremark pharmacy benefit management or PBM clients to improve care for patients who either are non-responsive to their medications or who have adverse reactions.

Trade CVS now with **Wealth Report**

The company said that the announcement illustrates CVS Caremark's intent to further strengthen its work on applying pharmacogenomic medicine to its benefit management product suite.

**MORNING MARKET ANALYSIS**

**Earnings Optimism Confronts Economic Pessimism**  
 The major U.S. index futures are pointing to a higher opening on Friday, with positive tech and bank earnings likely to give some support to the markets. Google (GOOG) reported forecasting beating results in the second quarter, strengthening expectations for strong corporate profit growth ahead of the peak earnings news flow. That said, economic data continues to be lackluster, with a regional survey showing that the manufacturing sector of the region is still in the contraction zone.
